

Parker (inPHorm™) On Line

- System Highlights**
- accumulator sizing and selection
 - Input formats:
 - rapid selection
 - systematic design
 - available information outputs
 - HPGL CAD drawing
 - CAD file (*.dxf)
 - selection summary printout
 - RFQ/order sheet printout

Version 3.7 makes accumulator product sizing and selection easy
 Parker offers leading-edge application assistance with **inPHorm™ for Accumulators.**

This program walks you through sizing the proper Parker accumulator product for your application. Using **inPHorm** will increase your efficiency and minimize the engineering time required to design in accumulators.

The program:

- guides you through the selection process
- performs calculations

“Advisor” options within the program offer additional assistance with special modifications and

design considerations. During any portion of the program, reference materials can be accessed or printed for future use.

inPHorm™ for Accumulators is available for use online at **www.parker.com**. Look under Quick Links for Product Selection Tools. For further information call Parker Hannifin Global Accumulator Division at **(815) 636-4100**.
